Analysed the finances

Approved

Pixel Code Studio maintains stable profitability with a 16.1% net margin, though it relies heavily on project-based revenue.

saved the analysis · created 4 tasks · decided 10/18, 01:12 PM

Stable

Pixel Code Studio maintains stable profitability with a 16.1% net margin, though it relies heavily on project-based revenue.

WHAT THE AI FOUND

High Fixed Cost Dependence. Fixed costs of 119,333,333 UZS consume 80% of total monthly revenue, leaving little room for operational flexibility.

Revenue Concentration. Client projects generate 125,000,000 UZS monthly, accounting for 84% of total income, which creates vulnerability to market fluctuations.

Salary Overhead. Salaries represent 76% of total expenses at 95,000,000 UZS, underscoring that human capital is the primary cost driver.

WHAT TO DO

1. **Increase support plan prices by 15%** — This will generate an additional 3,550,000 UZS in monthly revenue with minimal impact on overhead.
2. **Optimize software and server subscriptions** — Conducting a license audit to cut unnecessary tools could reduce the 6,333,333 UZS expense category by 10%, saving 633,333 UZS per month.
3. **Renegotiate office lease or shift to hybrid model** — Reducing the 15,000,000 UZS rent expense by 10% through renegotiation would immediately improve net profit by 1,500,000 UZS.
4. **Expand support plan subscription base** — Converting 20% of project clients to ongoing monthly support plans would stabilize cash flow and reduce dependence on one-time project revenue.

You make money every month — your cash does not run out.

Pixel Code Studio is currently profitable with a net monthly gain of 24,000,000 UZS, meaning your cash runway is not a concern. You are in a strong position to build reserves while maintaining your current operations.

WHAT TO DO

1. **Increase support plan pricing by 15%** — Adds approximately 3,550,000 UZS to monthly profit by leveraging your recurring revenue base.
2. **Renegotiate office lease or shift to a hybrid model** — Reducing rent by 10% would save 1,500,000 UZS per month, improving your overall margin.
3. **Optimize cloud server and software subscriptions** — Auditing underutilized software licenses could cut monthly expenses by 1,000,000 UZS.
4. **Allocate surplus to a high-yield business savings account** — Building a cash buffer of 72,000,000 UZS over three months ensures stability against potential project delays.

Picked a bank loan

Approved

Hamkorbank — Kichik biznesga yordam (small business support)

saved the loan choice · created 1 task · decided 10/18, 01:13 PM

HAMKORBANK

Kichik biznesga yordam (small business support)

Amount	Rate	Monthly payment	Total interest
150 000 000 UZS	18–21%	5 651 260 UZS	53 445 364 UZS

23.5% of your monthly profit

Bank page →

Why this one: The Hamkorbank loan is the most cost-effective option, offering a lower interest rate that results in a more manageable monthly payment of 5,651,260 UZS. With total interest of 53,445,364 UZS, it is significantly cheaper than the alternative, allowing Pixel Code Studio to maintain a healthy 23.5% payment-to-net-profit share.

HOW TO APPLY

1. Prepare your latest monthly financial statements and tax filings for the last 6 months.
2. Draft a formal request detailing the specific IT equipment to be purchased with the loan.
3. Schedule an appointment with a Hamkorbank business loan officer to discuss collateral requirements.
4. Submit the loan application package including business registration documents.
5. Undergo the bank's assessment of your collateral (property, vehicle, or guarantee).

WATCH OUT

- Collateral risk: Ensure the asset used as collateral is stable, as failure to repay puts your business or personal property at risk.
- Cash flow strain: A monthly commitment of over 5.6 million UZS reduces your operational buffer; prioritize increasing support plan revenue to cover this gap.

Pixel Code Studio Business Plan: Sustainable Growth in Tashkent IT Sector

saved the business plan · decided 10/18, 01:13 PM

Pixel Code Studio Business Plan: Sustainable Growth in Tashkent IT Sector

Summary: Pixel Code Studio is a Tashkent-based IT firm providing professional web development, Telegram bot integration, and mobile app services to B2B clients. Currently profitable with a 16.1% margin, we leverage recurring support plans to stabilize cash flow. Our 12-month forecast projects a cumulative profit of 688,535,476 UZS by October 2027 based on 3% monthly revenue growth.

Problem: Local Tashkent businesses struggle to find reliable, localized IT partners who understand the nuances of the Uzbekistan market, specifically regarding Telegram automation and regional payment gateway integrations.

Solution: We offer bespoke software development combined with monthly maintenance and support plans that ensure long-term digital stability for our clients, creating a reliable stream of recurring revenue.

Customers: Small to medium-sized enterprises in Tashkent requiring digital transformation, specifically retail and service businesses looking to automate customer service via Telegram.

Competition: Larger regional IT agencies and individual freelancers; we maintain our competitive edge through high-touch local support and a specialized focus on the Uzbekistan digital ecosystem.

Operations: Our team of 9 operates from a central office in Tashkent. We utilize agile project management for client projects and tiered support packages to manage incoming technical requests efficiently.

Team: A 9-person multidisciplinary team including developers, a project manager, and support staff, supported by an outsourced accountant to maintain financial compliance.

MARKETING

- **Telegram & Networking:** Direct outreach to local business hubs and industry meetups in Tashkent to convert network contacts into long-term support clients. · 5 333 333 UZS

MILESTONES

December 2026 — Achieve monthly revenue of 153,126,667 UZS and secure 5 new long-term support contracts.

October 2027 — Reach an accumulated profit of 688,535,476 UZS and optimize operational efficiency to maintain a stable cost base.

FUNDING: 150 000 000 UZS

- Working capital for accelerated project delivery — 100 000 000 UZS
- Upgrading server infrastructure and developer workstations — 50 000 000 UZS

RISKS

- **Talent attrition in the competitive Tashkent IT market.** — Implementing a performance-based bonus scheme funded by recurring support plan growth.
- **Revenue stagnation.** — Enforcing the 3% monthly revenue growth strategy through targeted upselling of support packages to existing clients.
